DETAILED ACTION

Response to Amendment

This Office Action is in response to Applicant's Amendment/Request for Reconsideration filed on September 28, 2005. Claims 1-4, 7, 9-12, 15, 17-20, 23 and 25-30 are present for further examination.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 7, 9-12, 15, 17-20, 23 and 25-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Urevig et al (hereinafter, "Urevig", U.S. Pat. No. 6,154,787).

As per claims 1, 9 and 17, Urevig discloses an information processing apparatus for use in managing a network system provided with a plurality of information processing apparatuses, each of which to connected is a plurality of shared devices that can be used by at least one other information processing apparatus through the network, said information processing apparatus comprising:

- management means for managing the information of a first shared device managed by said information processing apparatus (col. 5, lines 14-25 and col. 6, lines 26-44);

- reception means for receiving, from another information processing apparatus, information of a second shared device used by the other information processing apparatus, the received information including information of in the second shared device comprising an updated status and a connected condition (col. 5, lines 61-65 and col. 6, lines 26-44);
- recognition means for recognizing which one of the first and second shared devices has been updated regarding its status, in accordance with the information received by said reception means(col. 6, lines 26-44 and col. 9, lines 32-41);
- renewal means for updating the information on a status or connected condition of the second shared used in accordance with a recognition result made by said recognition means (col. 6, lines 26-44 and lines 53-59); and
- display means for displaying the information on the status or the connected condition of the second shared device updated by said renewal means and the information of the first shared device managed by said management means on a same screen of said display means (col. 5, lines 61-65 and col. 6, lines 39-44).

As per claims **2, 10** and **18**, Urevig discloses:

- wherein said reception means includes first reception control means for designating a group satisfying a predetermined condition and receiving the information of the shared device included in the group (col. 6, lines 26-44 and col. 9, lines 32-41).

As per claims **3, 11** and **19**, Urevig discloses:

- wherein said reception means includes second reception control means for detecting a log-on operation of another information processing apparatus to the network system and

Art Unit: 2157

receiving the information of the shared devices managed by the other information processing apparatus (col. 9, lines 32-41).

As per claims 4, 12 and 20, Urevig discloses:

- wherein said reception means is adapted, at a log-on operation to the network system, to automatically receive the information of the plurality of shared devices present on the network system (col. 9, lines 32-41).

As per claims 7, 15 and 23, Urevig discloses:

- wherein said renewal means is adapted, in response to the detection of a log-off operation of another information processing apparatus from the network system, to invalidate the information of the shared devices managed by the other information processing apparatus (col. 9, lines 32-41).

As per claims 25, 27 and 29, Urevig discloses an information processing apparatus for communicating with at least one other information processing apparatus and a plurality of devices via a communication link, and managing a plurality of shared devices said apparatus comprising:

- management means for managing information of a first shared device managed by said information processing apparatus (col. 6, lines 26-34);
- obtaining means for obtaining information, from another information processing apparatus, information on a status or connected condition of a second shared device managed by other information processing apparatus (col. 5, lines 61-65 and col. 6, lines 26-44);

Art Unit: 2157

- recognition means for recognizing which one of the first and second shared device has been updated regarding its status or connected condition, in accordance with the information obtained by said obtaining means (col. 5, lines 61-65 and col. 6, lines 39-44); and
- display means for displaying, on a display of said information processing apparatus, the information on the status or the connected condition of the second shared device, and information on a status or a connected condition of the first shared device in accordance with the information managed by said management means (col. 5, lines 61-65 and col. 6, lines 39-44).

As per claims **26, 28 and 30**, Urevig discloses:

- wherein said display means displays on the display of the information processing apparatus information on the status or the connected condition by icon changes (col. 5, lines 66-67 and col. 6, lines 1-9).

Response to Arguments

4. Applicant's arguments with respect to claims **1-4, 7, 9-12, 15, 17-20, 23 and 25-30** have been considered but are moot in view of the new ground(s) of rejection.
